

## M.Sc. in Cutting-Edge Water Desalination Research

- Innovative research in selective ion removal from water
- Topic with a wide variety of real-world water applications
- M.Sc. project combines desalination experiments and electrochemical analysis
- The lab is affiliated with GTEP and Mechanical Engineering, and also accepts Nanotech, Chemical, or Environmental Engineering students
- Basic requirements: bachelor of engineering or science (chemistry, mechanical, chemical or environmental engineering)

- For interested candidates:

Eric Guyes – [eguyes@campus.technion.ac.il](mailto:eguyes@campus.technion.ac.il)
